

# Customer Supplied Artwork

## Formats we accept

Our Art Studio is able to accept artwork supplied on disk for both Apple Macintosh and IBM PC systems. Below are the more popular programs and file formats we can access.

We also have a comprehensive range of conversion software so if the format you prefer to use is not on this list, we may still be able to access your files. If this is the case please contact our Art Department.

### Media Type

Macintosh & PC (Windows)

Flash/USB Stick

CD/DVD ROM

Jaz Disk

Email

Please Ask For Other Formats

### Applications

Macintosh & PC (Windows)

Corel Draw 9,10,12,X3

Adobe Illustrator 10 & CS

Adob Photoshop (Digi Print Files)

Other file formats: DXF, DWG, EPS, PDF

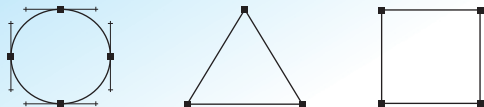

## Working with images

**Digital Printing:** Images for digital printing must be (IBM) TIFF Files with no compression. Files need to be a minimum of 300dpi, RGB format with 3mm bleed edge.

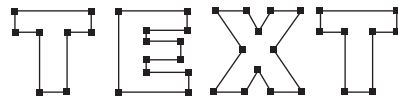

**Screen / Etched / Anodised Printing:** Images need to be vectored graphics as shown below. Lines need to be a minimum of 0.5pt (0.1764mm) thick.

**Logos:** need to be provided as vectored graphics for Screen and Digital printing, although we can accept Tiff format for Digital printing

### Vectored Graphics

### Text converted to Curves / Paths

## Working with fonts

When supplying artwork we need a copy of all the fonts used in the file or alternatively all the fonts converting to Curves / Paths / Outlines.

**It is our company policy that All artwork including artwork supplied is sent back to the customer for approval, to ensure that the files have the correct fonts etc.**

Some times we send colour printed artwork for approval, the colours are to show the colour splits of the print rather than an example of colour.

**We will NOT manufacture any order without approved artwork.**
